Feeding

The ideal diet

French Bulldogs are one of the most sensitive breeds. A great diet helps prevent skin and tummy troubles, plus other allergies.

Fresh food delivery

Gently cooked, human-grade meals delivered to your door. It's our favorite way to feed a Frenchie.

The raw (BARF) diet

An excellent approach once your Frenchie turns 6 months old. It's anti-inflammatory and can help with allergies and joint issues, which Frenchies are prone to.

Supplements

Bone broth, probiotics, omega-3 and a joint supplement support healthy growth. Keep them up long-term for top-notch skin.

OUR FRESH-FOOD PICK

Spot & Tango Fresh Food

- ✓ Human grade
- ✓ Formulated for all life stages
- ✓ Gently cooked
- ✓ Gluten and corn free (the most common Bulldog allergens)
- ✓ Delivered to your door

Meals arrive frozen, so thaw before serving. Choose lamb, turkey or beef.

Order and customize your puppy's plan with our link. Your Ethical Frenchie puppy whisperer can give you the details it asks for, like your pup's weight and age.

Other foods we recommend

Never switch your puppy's food overnight. Every switch should be gradual.

The Honest Kitchen

Human-grade powdered food that takes about 5 minutes to prep.

Freshpet

Fresh food you can pick up locally.

At PetSmart & Petco

Raw Dynamic

Raw food for pups 6 months and up.

Farmina Kibble

We never recommend kibble, but if fresh food is out of budget, Farmina is the only kibble we trust.

Supplements

★ MUST-HAVE

Aller-Immune Bites

A long-term must for Frenchies. Daily use keeps their skin in great shape and their immune system working properly.

★ MUST-HAVE

Joint Supplement

Another long-term must. Glucosamine helps prevent hip and spinal disc issues.

★ MUST-HAVE

Bone Broth Powder

Supports healthy digestion, gives an immunity boost and nourishes sensitive joints.

Fish Oil

A great, optional addition. The Aller-Immune Bites already contain plenty of salmon oil.

Firm It Up Pumpkin

For poops on the softer side. This pumpkin supplement firms things up fast.

Bowls

These professional manipulators will beg every time the fridge opens (news flash, they're not hungry). Keeping them lean helps avoid health problems.

★ MUST-HAVE

Slow Feeder Bowl

Stops them swallowing too much air (hello, gassiness) and prevents choking.

★ MUST-HAVE

Elevated Water Bowl

Any ceramic or stainless-steel bowl works, just skip plastic. Elevated matters on a dry-food diet.

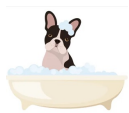

[SHOP NOW →](#)

Water Fountain

24/7 fresh, flowing water. Is it boujee? Yes. Do they need it? Also yes.

Grooming

So fresh & so clean

Skin care routine

Face care several times a week, at least once

- ✓ Clean their wrinkles to prevent bacteria build-up and infection.
- ✓ Moisturize the nose every other day. Their flat faces mean they can't lick it moist.
- ✓ Use wrinkle paste if your pup develops tear stains.
- ✓ Moisturize and protect their paw pads.

★ MUST-HAVE

Snout Soother

Keeps that flat-faced nose from drying out.
